PROFESSIONAL SUMMARY

Software developer focused on applied artificial intelligence, computer vision and process automation, with experience in manufacturing quality and business systems. Builds RAG applications and quality traceability tools with Python, C#/.NET and SQL, and uses data analysis and Power BI to support decisions and streamline operations.

TECHNOLOGIES

AI & data: Computer vision, RAG, embeddings, LLM integration, Power BI, data analysis, big data
Development: Python, C#, .NET, JavaScript, Java, Kotlin, React, React Native, FastAPI, Laravel
Databases: PostgreSQL, pgvector, SQL Server, MySQL
Automation & infrastructure: Excel macros, SAP Business One, Docker, Linux, Windows Server, networking, backups

EXPERIENCE

Software Development Intern | Oct 2025 - Apr 2026
Volkswagen Plant Guanajuato

- Developed TraceAIbility, a RAG-based quality assurance system with local embeddings for engine assembly.
- Integrated a React Native frontend with a Python backend to digitize nonconforming-part traceability, support failure analysis and identify recurring issues.

Programming Assistant | 2021 - Aug 2025
Compañía Plástica Internacional, S.A. de C.V.

- Built and maintained EmpManagement, integrating biometric attendance, pre-payroll, HR, contracts, inventory, reporting and workforce KPIs; reduced payroll preparation time by over 70%.
- Automated departmental tasks with Excel macros; administered Linux/Windows servers, networks, security controls, backups and recovery procedures.

SELECTED PROJECTS

NeuroTAP. Local-first smartphone research prototype for multimodal Parkinson's screening, integrating voice, inertial and touchscreen data acquisition, quality checks and feature extraction. Predictive modeling and clinical validation pending.

NCtrl. Industrial nonconformity management prototype with traceability, corrective actions, analytics, reporting, optional local RAG and experimental visual similarity retrieval. React, FastAPI, PostgreSQL/pgvector, Docker.

TraceAIbility. AI-assisted quality traceability and recurrence analysis for engine assembly. Python, React Native, RAG with local embeddings.

EmpManagement. Pre-payroll and HR platform with biometrics and operational reporting. C#, .NET, SQL Server.

SELECTED AWARDS

- **2nd place, national:** VW-GTO 3.0 Challenge, Volkswagen Plant Guanajuato, for TraceAIbility.
- **Winner:** Guanajuato State Labor Merit Award 2024, for EmpManagement 2.0 and payroll automation.
- **1st place, local phase:** InnovaTecNM 2025, Innobótica - Industrial Manipulator Robots, project BG-AM.

INTERNATIONAL AWARDS & PRESENTATIONS

- **Rally Latinoamericano de Innovación 2025:** 1st place, regional Innovation category, Celaya site, Team Leakova.
- **Speaker, XIII Encuentro Internacional de Innovación Tecnológica (EIIT):** NeuroTAP, Ocaña, Colombia.
- **Speaker, EISI RedCOLSI 2026:** II Encuentro Internacional de Semilleros de Investigación, Panama City, Panama.

EDUCATION & LANGUAGES

Computer Systems Engineering | Tecnológico Nacional de México, Instituto Tecnológico de Celaya | 2022 - Aug 2025
Specialization: Data Intelligence and Cloud Platforms
Technician in Programming | CETis No. 115 | 2018 - 2021
Languages: Spanish, English
